

JFLR | Aims and Scope

JFLR is an international open access journal presenting current research into forest ecosystems and forest management in a **landscape context**.

The journal publishes

- original research papers,
- short communications, and
- review papers

presenting findings from

- experimental and empirical studies,
- modelling studies, and
- conceptual studies

of forest ecosystems, plantations and trees in urban environments worldwide.

Particular emphasis is given to **inter- and transdisciplinary** approaches and studies with a focus on the **interactions** between forests and other landscape components.

JFLR | Scientific Subject Areas

Bioenergy & Biotechnology
Ecology & Conservation
Economy & Management Planning
Engineering & Utilisation
Human Dimensions
Risks & Health
Silvicultural Systems
Soil Biology & Chemistry
Urban Forestry
Wildlife Ecology and Management

Journal of Forest and Landscape Research

Open Access

Double-blind peer-review

Scientific statement

Post-publication discussion

JFLR | Peer-Review Process

The JFLR **double-blind peer-review** process ensures rapid, transparent and fair reviews, high quality manuscripts, and an ongoing scientific discussion of published articles.

JFLR strives to complete the entire review and publication process **within 3 months**.

Abridged version of the review flow chart, full version available online

JFLR | Submission

JFLR only supports full online submission via Open Journal Systems.

Go to www.jflr.org

- to access the JFLR Author Guidelines
- to submit manuscripts
- to track the status of submissions

JFLR | Fees

JFLR will not charge any publication fees for manuscripts submitted as LaTeX files.

Authors cover the costs of English language proofreading and editing services. For more information please visit our website.

Why publish in JFLR ?

Rapid open access publication: double-blind peer-review and publication within 3 months

Promotion of high quality reviews: publish reviews as citable Scientific Commentaries

Science is dynamic: discuss and comment on any published JFLR article

Going beyond: presenting and discussing forest science in a landscape context

Counterbalancing the publication bias: authors are encouraged to submit excellent studies presenting non-significant findings

Open access: paper will be available online for free

Cost-effective: lower costs for publishing in comparison to other open access journals

JFLR | Hosting
